

COMMERCIAL LOCATOR SERVICE

Professional • Experienced • Licensed

Investigative Resources International's Commercial Locator Service provides professional services to locate missing participants and beneficiaries and similar matters.

These investigations are conducted to meet "diligent search" requirements as required by the Missing Participant Program of the Pension Benefit Guaranty Corporation (PBGC) and the Code of Federal Regulations (Title 29 §4050.4 - Diligent Search).

Our Commercial Locator Service combines available technologies, public records research experts and the internet to provide a cost-effective method to find missing participants and beneficiaries.

Each search investigation is completed by a special team of trained investigators utilizing available public and proprietary records, developed sources and other professional techniques.

Investigation is undertaken to further identify the person or persons being sought, to ascertain their current address and other valuable contact information such as telephone, email, social media accounts, employer or relatives (next-of-kin).

Commercial Locator Service is able to conduct investigations to locate a single individual or to undertake large-scale projects. We specialize in difficult or complex cases.
